Exercise 6: Weighted Least Squares

Prof. Dr. Thomas Kopinski

August 9, 2022

Abstract

These tasks will provide you an insight into using weighted least squares analysis to perform regression on a dataset by using python.

Task 1: Get familiar with the algorithm

- Additional information as well as examples about the weighted least squares method can be found in the accompanying resources/slides to this course as well as [here](#).

Task 2:

Task 3:
