Machine Learning
Exercise 8: Using random forest classifiers in python

Prof. Dr. Thomas Kopinski

August 9, 2022

Abstract

In this exercise you will learn how to implement and use a random forest classifier in python by utilizing the scikit-learn module.

Task 1:

- Additional information and examples about implementing and using decision trees and random forests for regression can be found at the bottom of this jupyter notebook.

Task 2:

Task 3:
